Our Vision

This projects goal is to learn, improve, and develop the next generation of Web3 decentralized applications. Our team is working towards evolving an innovative platform that utilizes the capabilities of data privacy and security. We strive to colonize a new stage of user experience and Peer-To-Peer technological development. Our perspective enables us to pursue a vast demographic of opportunities while maintaining user security through the development and implementation of our application and network.

Airdrop Rollout

Part of our community engagement outside of social media and discussions are the events and giveaways. These events vary from weekly hot topic discussion boards to gaming tournaments held our users who take initiative. There are no limits to these events and we encourage our members to create and lead their own events through our community.

Current Events

Community WEB Discussion

Airdrops

Events and Giveaways

Community WEB is designed to inspire members to partake in discussion and create unique conversation between like-minded individuals within our environment
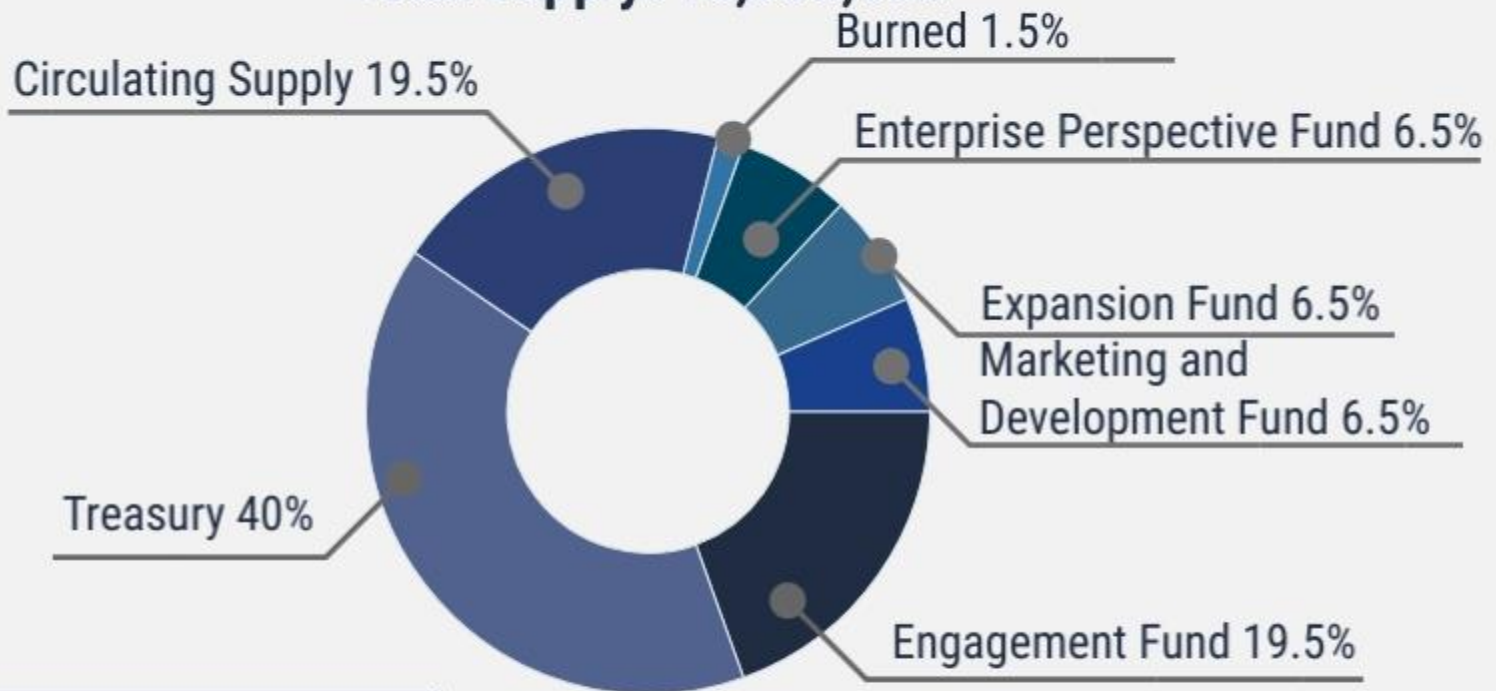

Our airdrops are designed to give our members an opportunity to get involved with our project, and incentivize people to grow and build their own projects alongside our own.

Our members have taken initiative to gain awareness of our project and lead events/giveaways in order to create a fun and collaborative space for our community,

Tokenomics

Total Supply: 10,000,000

Circulating Supply 19.5%

Burned 1.5%

Enterprise Perspective Fund 6.5%

Expansion Fund 6.5%

Marketing and Development Fund 6.5%

Treasury 40%

Engagement Fund 19.5%

Tokenomics Breakdown

40% Treasury

Allocation of this fund functions as a foundation for growth through the engagement and development wallets in order to maintain consistent roadmap progress.

19.5% Circulating Supply

All tokens available to our community from initial liquidity, airdrops, and giveaways.

19.5% Engagement Fund

This is comprised of the currently available tokens utilized for airdrops, giveaways, and events. These funds are then sent to a mutual wallet between community members and moderators of our discord to lead their own engagement.

Made with VISME

Our reasoning behind dividing our development into three separate funds is to create a sense of equality among our different teams and departments as we foresee future projects. This system also creates security for our token through token distribution to distinct wallets that are maintained through a business structure.

Fund Breakdown

The Enterprise Perspective Fund

Our Perspective Fund's goal is to revolutionize the next era of digital finance and Peer-To-Peer technologies. This fund is designed to research and experiment new technical capabilities for a decentralized application.

Expansion Fund

The simple idea of this fund is to implement and execute the newest and most promising ideas provided by the Enterprise Perspective Fund. Our plan is to have ideas and research ready for our cross-functional developers and engineers to carry out projects and milestones to reach new heights in the world of decentralizalization.

Marketing and Development Fund

Once ideas and platforms are developed through our Expansion Fund, and ready to be implemented onto our network, our marketing and development team will delegate into ventures such as press releases and advertising campaigns.

[WEB] Thread Project

Our WEB Thread Project is designated towards giving users a unique and secure entertainment experience. An application where you are free from providing personal information, yet being able to interact and have a presence in the online community. Be sure to check out our website and socials to stay updated on our app and future projects!

Essential Features

Privacy and Security

Each time a user logs on to our application a unique key is created for that session. This keeps all logs and storage free from your private information.

Autonomous Interaction

Every member has the opportunity to engage as a user created account or opt into the incognito mode in which they interact anonymously with our platform.

Location Attribute

Each user has the decision to enable location services, but all users have access to our global page with or without location enabled. The global page gives users access to posts and threads in locations of interest.

Roadmap

Phase 1
- Project Planning and Market Research
- Smart Contract Development
- Whitepaper Launch
- Social Media Creation

Phase 2
- Website V.1
- Prelaunch Marketing Development
- PancakeSwap Listing
- Phase 1 Airdrop Delivery
- Community WEB Discussion

Phase 3
- Marketing Campaign Launch
- Community Events
- Media/Press Releases
- Documentation and Media Update

Phase 4
- CoinGecko Listing
- CoinMarketCap Listing
- Post Launch Awareness and PR Campaign
- Phase 2 Airdrop Delivery
- Core Team Creation
- WEB Thread Project

Get Involved

Our intent is not just to create a community token, but to give each user a unique opportunity to be apart of who we are. We desire to create engaging content and maintain a professional manner to initiate discussions in this forever growing industry. Our social media and customer service teams strive to instigate new conversation, because in the world of cryptocurrency and technology the conversation never stops.
